

The ACronaut

Volume 5 - Number 10

Prez' Post

Darren Pleasance

Greetings from the road...

I'm running from city to city this month and logging dozens of hours in the air, though in the back of the plane, rather than the front, unfortunately. As such, my Pres Post will be a little shorter than normal, but no less inspira-

tional, of course :-)

For those of you who missed our first "fly-out" of the year, it was truly an outstanding event. We had on the order of ~12-15 members in attendance at our meeting/lunch session in Petaluma with a ton of fun had by all. We should aspire to do this more often as a Chapter; perhaps twice a year at least.

As part of the trip, four of us got together to practice our formation flying, including a pre-flight briefing, inflight maneuvers, and a worldclass overhead arrival in Petaluma that would have made the Blue Angels envious. Afterwards, we talked about the idea of creating a Chapter initiative to help more of our members learn how to safely enjoy formation flying. At our Chapter meeting coming up in two weeks, we'll be sure to talk a little about how many members would be interested in some type of effort to help add formation flying to the spectrum of capabilities we all have.

We'll also plan to catch everyone up on the ongoing "box" topic. As we talked in Petaluma last month, there may be opportunities for us to co-exist with the skydivers over in Byron so we're pursuing discussions over there to see what we

Editor's Column

Peter Jensen

This past month had lots of flying and racing activities. Thanks to Marilyn all of these activities are well covered in this issue.

The Nationals just finished so look for the results and stories in the next newsletter.

I would love to hear from the IAC 38 participants for some

stories for the November issue.

From a regional aerobatic standpoint, the Delano contest was the ultimate highlight this month. It was the best attended California contest this year, and I would suspect that it'll probably be the regional contest with most participant nationwide this year. 56 participating pilots! Marta and Bob Meyer did a phenomenal job organizing it.

Enjoy this newsletter!

-Peter

Pilots Currently on the Waivers

As of 5/1/2004 our TCY waiver has expired. No one are allowed to fly in the TCY box until the waiver gets renewed. Please observe this temporary restriction. The New J waiver has been renewed. Please contact one of the designated briefers, if you wish to fly in the box (below 1,500 feet).

Pilots on the TCY Waiver (10/1/2004)

NO ONE. Waiver is expired. Awaiting renewal.

Heard It On The Ramp

Marilyn Dash

The month of September starts with Delano, ends with Nationals and engulfs the Reno Air Races. This means, plenty has happened in the last 30 days.

Delano

Delano was a BIG HIT! As usual, the world's hottest contest brought lots of memories. When we first arrived, we asked one of the locals where we could go to get a good meal, he said, after some thought, "Bakersfield!" Which, as many of you know is about 30 miles away? So, off to the Cockoo Inn and the continuous tongue jokes. See the Cockoo Inn has an appetizer plate that offers -- no kidding, pickled tongue. Only in Delano... we hope.

The Unlimited Category had some newcomers – who were also familiar faces. Bill Stein and Nick Nilsmeier both competed in Unlimited for (if my memory is correct) for the first time. Both graced the audience with their talents in the four-minute; which was amazing! Speaking of Unlimited, Mrs. Meyer beat Mr. Meyer – for the first time! "So, Mr. Meyer, when did you stop beating your wife?"

Chapter 38 had a great showing at Delano. Team BARF was there – minus one (chicken!) and the new S2A got a good try-out! Attitude brought their Pitts and Decathlon, Eric Tucker brought the S2B with a gaggle of students, and Rich Stowell was also in attendance with Lyle Shelton's S2B plus one student. This equated to twenty-something Sports-person Contestants! The sport seems to be gaining ground with the huge number of entrants in the lower categories!

The high"light" of the contest had to be the attempted Beacon Rides. Don't try it. It's just not a good idea. Apparently, the Beacon is HOT! And it also stops when you try to jump on it. Make a note; do not try to ride the beacon in the future.

Since we had to scrap that idea, we decided to bring the party to the Center Box instead. If you've been to DLO – you know that Center Box is out in the middle of the street – so, we had to find yet a third place to bring the party. The Hay Ride out

there and back was memorable! What a peculiar group we are...

Reno

The next event for me – and many of us – was the Reno Air Races. I was a Rookie this year and definitely learned a ton! I learned that my airplane is friggin' slow! It looks fast, and sounds awesome, but she is slow. Another thing I learned is that Density Altitude STINKS!

I was incredibly lucky to have so many people from Chapter 38 and from my home airport, Hayward, there to cheer me onward. I appreciate everyone's kind words and enthusiasm.

With many lessons learned and many lessons yet to come, I really enjoyed myself and am glad I took part. I'm 90% sure I'll do it again. So, if you want to know more – let me know. I'll bore you with details over an adult beverage sometime.

Now, about the Red Bulls Air Race... WOW! That was amazing! I'm not sure how wise that sport is – but boy, it has some crowd appeal. I was watching the Red Bulls everyday with a group of Aerobatic Pilots – and we were cheering them on (Mike Mangold, Kirby Chambliss and Mike Goulian!) the whole time. It was really something to watch. There were three sequences that needed to be performed using these inflatable pylons. For example, do a roll, go through the first set of pylons on knife-edge, change to the other knife-edge through the next set of pylons, then pull to the vertical, etc. etc. As if that wasn't hard enough, this was timed! So, pull HARD and tight and get it all done faster than the next guy.

(Continued on page 6)

Member Of The Month - Ben Freelove

Marilyn Dash

This month, we will be getting to know Ben Freelove a little better. Freelove, or Freestyle, as we like to call him, is a CFI, Aerobatic Competitor, Banner Tower and all around GREAT guy. For those of you who already know him, you'll enjoy reading this – but for those of you who don't know him yet, welcome to the world of Ben.

When did you become a pilot and why?

I got my Private Certificate in 1999. Fly-

ing was something I was always interested as long as I could remember.

What was your first experience with aerobatics?

After I earned my Private I knew I wanted to fly aerobatics. I had done all my training in Dayton, Ohio and Brian Howard (IAC rules guy) had an Extra 300 on the field. I couldn't afford it at all but I skipped a bunch of meals and finally flew with Brian.

I had never flown anything except a Cessna 152 before. Needless to say I was hooked.

What other aspects of aviation are you interested in?

I really enjoy flight instructing of any kind. It is a big challenge and I love trying to get better at it every day.

He also tows banners all over the Bay Area. If you see a banner, wave, it's probably BEN!

What aircraft do you fly, and why?

I teach and fly in a wide variety of airplanes, but I'm currently flying Acro in the Pitts S2A. The S2A is probably the best combination of performance vs. cost for a 2 seat aerobatic airplane. Plus it just looks cool!

Tell us something about yourself that most people don't know?

I was a professional jazz musician for five years before the flying bug hit hard and I moved to California.

What other hobbies do you have besides flying?

I still play music occasionally.

What do you do for a living?

I'm a full time CFI.

What is your favorite aircraft?

So far the Pitts is my favorite. It is a great blend of performance and character. But there are a few monoplanes I'd love to get my hands on.

What was your most memorable flight?

This question is too hard. I give up.

I'm sure I know what Ben's most memorable flight was! It was flying at Paso with ME as my Safety Pilot. If the readers remember – Ben was the Safety Pilot for Che Barnes and Spencer was the Safety Pilot for me (Ruby was sick that weekend). So, for the last flight, Che and I switched planes. It was the first time I flew with Ben. I must say, he has the same controlled demeanor that Ken Erickson has which made me love to fly with Ken so much.

If you feel like some additional instruction – you should talk to Ben Freestyle!

A Rare Story

Marilyn Dash

For those that don't know about the Bear's problems this week, I was lucky enough to hear John Penney recall the situation between last Sat and Friday night at the "fan Sponsor" party. When John flew the Bear last Sat and Sun it seemed the ignition and carb problems were finally behind them. They had finally found someone who could build cylinders with valve guides to their specs and replace the ones that went bad last year, and had 2 spare front and rear jugs on hand.

John went out on the course with Skip on Monday and said Skip was going very slow in Dago. John called for the clock and was very disappointed with the line he flew as well as the altitude management (qualifying laps are flown on a constant descent which is why race laps are slower) and felt he left about 10 knot "on the table". He was surprised that Skip beat his time but figured he'd try again on Tuesday. But, on the post flight, the crew found metal in the screens.

Was it silver (master rod bearing) or something else? They took a sample to an "expert" in Reno who said it was aluminum. He was wrong (charge them \$275) and sent the crew on a wild goose chase. The only aluminum is from the pistons so they scoped through the plug holes and found no damage. So they pulled a front and rear jug to scope the bottoms of the pistons for skirt damage (a source of a rumour on this forum) and found none. So they thought it must be old debris that broke loose and were thinking about running up the engine to check to screens again. Good thing they didn't.

Lyle had an elderly gentleman in his 80s or 90s whose name I

can't recall flown in who had spend a good portion of his life with the Wright 3350. He took one look at the metal from the screens and said it was the blower drive-don't run the engine. The crew pulled off the blower drive and, as you can see from the pics I posted Friday night, that it was all done. Lyle said the engine was close to destruction.

New parts were delivered to the crew a 2 am (Tom Dwelle offered the parts off Critical Mass if needed-what a great guy!), they were installed and the engine was run. The screens showed a lot less metal and what there was was safe to run, so John test flew Thursday and there was even less metal. They decided on a conservative power setting for the Friday race, and the screens were almost clean but another exhaust valve guide from one of the old jugs went bad (low compression), so yet another all-nighter by the crew (who had only about 2 hrs sleep each night from Mon to last night) was required to change the jug. It requires break in time and John flew a little before the Friday race and a quick check showed no metal but it was decided to run conservative again (obviously I am now past John's Friday night dissertation and am repeating what I heard from other crew members) and the airplane came back clean. They changed the ignition harness and other ignition parts Sat night and test flew early Sunday. They then decided what power setting to run (this was dry, no nitrous oxide as they still have 9 old jugs with questionable valve guides), and the rest, as they say, is history. Going back to Friday night, Lyle said he was pretty sure that they would have to settle for another second place, but was determined to "run right" and not damage anything so they can come back next year. And, not to repeat what others have said on this forum, the Bear may have been able to when even without the penalty, but she is still not quite as strong as she was in 1991, but next year - LOOK OUT!..

Also, remember that using the "old" course measurements, Dago has never beaten Lyle's race record or lap record. And for the unofficial straight line 3k record Dago set at 533, remember 3 of the 4 passes Lyle made in the Bear were over 540, and that was with the 4 blade prop she has now.

The crew was magnificent, going without sleep, sometimes without food, and sometimes even working a "day Job" to get this done. One crewman told me "Nobody could ever pay us enough to do this", which is why, at least this time, perseverance, dedication, and a little luck overcame cubic dollars in the race for the Gold.

And check out what Skip Holm said in today's Reno Gazette Journal (www.rgj.com)-"If any body thinks Rare Bear is NOT the fastest airplane out here, they better think again".

(Continued from page 3) - Heard It On The Ramp

Mike Mangold took first place! He had a BLAST! Kirby 2nd and Goulian 3rd.

Before I forget, Rare Bear WON! Dago Red cut a pylon... well, you'll read about it later in the newsletter.

Nationals

The Nationals have just finished and Chapter 38's Todd Whitmer is now a NATIONAL CHAMPION in the Intermediate Category! Also, it would be good to point out that Allyson Parker Lauck earned a spot on the US National Team! Great job, BOTH OF YOU!

See you soon!

Two IAC38'ers makes the US Unlimited Team

The Unlimited female US Team for the World Aerobic Championship, in Burgos Spain, was selected at the recently held Nationals. Two IAC38'er made the team; Vicki Cruse, and Allyson Parker-Lauck. Congratulations!

The team, pictured below, from left to right: Vicki Cruse, Janet Fitzke, Chandy Clanton, Debby Rihn-Harvey, and Allyson Parker-Lauck.

Todd Whitmer Wins Gold @ Nationals

The Nationals was this past week. Todd Whitmer took home the gold in Intermediate in convincing style. Todd's score was 85.25%. Second was Brent Smith with 84.49%, and third was Melissa Andrzejewski with 84.13%.

Congratulations from all of IAC 38!

Complete results and tons of pictures from the US Nationals can be found at:

Marilyn Dash

(Continued from page 1) - Prez' Post
might be able to accomplish.

Regarding Tracy, there's been no further progress on the Tracy Box, however it looks as though the City will be making investments to fix up the New J airport over the coming weeks so we should begin to benefit from an ever-improving aerobatic box at New J. Speaking of Tracy, they had a nice "Airport Day" on September 25th with a great community turn out including a handful of our members there showing their support (thanks to Ben, Che, Dale and Harry for representing Chapter 38!!)

Lastly, we had some of our members miss last month's meeting as they pursued their racing passions in Reno so I'm looking forward to hearing from them about what it's like to race 50 feet off the ground with lots of other wacky biplane pilots (I'm a wacky biplane pilot so I can say that). Also, for those of you who missed the Red Bull air race at Reno this year, it was quite an event that I'm sure we'll talk about at our upcoming meeting.

Well, I've gotta run to my next plane. I look forward to seeing you all at our next Chapter meeting in Livermore on Sunday, October 10th.

Blue skies!

Darren

Contest Results

Peter Jensen

Marta and Bob Meyer and their crew of volunteers pulled off one of the best ever Delano contests. There was a great turnout - 56 participating pilots. I think that's close to a record. This was the 30th anniversary of this great contest and it couldn't have been more successful. The weather was great, no mishaps, and all 56 pilots (minus 1) got three flights in before 4pm Sunday. That's a total of 120 flights (including 4x 4-min free). It's great to see so many enthusiastic newcomers. Especially, in these times where increasing fuel cost and more government regulations are added obstacles.

Jacque Warda
